Big Switch® is a highly qualified/exceptionally valued 100% USDA biopreferred compost sediment filter that gives you the erosion control you need. The Big Switch® is oval to round in cross-section, designed to provide a three-dimensional medium that retains sediment and other pollutants (e.g., suspended solids, tannic acid, nitrates, phosphates, and motor oil) while allowing the cleaned water to flow through. Because The Big Switch® Erosion-Filtration Medium has greater surface area contact with soil than typical sediment control devices, it reduces the potential for runoff to create rills under the device and/or create channels carrying unfiltered sediment and comes in 4", 8", 12", 18", 24" and 32" diameter.

**PA LICA BENEFIT:** 2% net 10 off for paying your invoice within 10 days. Plus, 5 % price reduction for 6 sacks of any sized diameter product ordered at the same time. Offer may change without prior notification.

Here are a few types of the erosion/filtration capabilities of Big Switch®:

- Erosion/Sediment Control
- Pollutant Removal
- Stormwater Management
- Slip Repair

## THE LICA STORY

This 5-minute documentary was filmed for PBS' Viewpoint with Dennis Quaid. The piece is about promoting the work that our contractors do daily.

As we all know, skilled operators and employees, around the country, are in short supply, and young adults often aren't aware of the career opportunities in the construction industry. This short-form documentary educates the public about contractors and LICA.
